PROFESSIONAL SUMMARY

Aspiring Software Engineer and Full Stack Developer with a strong foundation in Java, Data Structures & Algorithms, and Object-Oriented Programming. Experienced in backend and full-stack web development using Node.js, Express.js, MongoDB, and React.js, with additional exposure to Spring Boot and Kafka through project simulations. Passionate about writing efficient, well-structured code and contributing to software engineering teams.

TECHNICAL SKILLS

Languages: Java, Python (Basic)

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, Express.js, Mongoose, Spring Boot

Databases: MongoDB, SQL

Tools & Platforms: Git, GitHub, VS Code, Kafka, Postman

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, CRUD Operations, Full Stack Development, Backend Development, Problem Solving

EXPERIENCE

InLighnX Global Pvt Ltd, Bangalore

Sep 2025 – Oct 2025

Frontend Developer Intern

- Built and optimized responsive web pages, improving cross-browser compatibility and performance.
- Designed and implemented UI components for live projects, enhancing overall user experience.
- Debugged and resolved frontend issues, reducing page load times by 20%.
- Contributed to Dashboard UI and E-commerce frontend module projects.

PROJECTS

WanderLust — Full-Stack Accommodation Listing Platform

- Developed a full-stack, Airbnb-style accommodation listing platform using Node.js, Express.js, MongoDB, Mongoose, and JavaScript, implementing RESTful CRUD operations for listings.
- Designed MongoDB schemas to model relationships between listings and reviews, and built server-side rendered views using EJS and EJS-Mate.
- Implemented request validation with Joi and custom Express middleware, with centralized asynchronous error handling using a reusable wrapAsync utility and a custom ExpressError class.
- Used method-override to support PUT/DELETE operations through HTML forms and built a responsive UI with Bootstrap; managed version control using Git/GitHub.

Student Performance Predictor

- Built a Python-based project to predict students' final marks using Linear Regression, including data cleaning, feature scaling, and train/test split with Pandas, NumPy, and scikit-learn.
- Performed exploratory data analysis and visualized feature relationships using Matplotlib and Seaborn.
- Evaluated model accuracy using MAE, RMSE, and R^2 metrics.
- Built a web dashboard using Flask to serve predictions interactively.

EDUCATION

DBIT, Bengaluru

Aug 2023 – Jun 2027

B.E. in Computer Science and Engineering — CGPA: 7.66/10

Relevant Coursework: Object-Oriented Programming, Databases, Discrete Mathematics, Data Structures and Algorithms, Operating Systems, Computer Networks, Advanced Algorithms.

CERTIFICATIONS

Software Engineering Job Simulation — J.P. Morgan (Forage), Sep 2025

Data Structures & Algorithms in Java — Apna College, Aug 2025

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle, Oct 2025

Technology Job Simulation — Deloitte Australia (Forage), Nov 2025
